ABOUT ME

I am a 5th-year student at the Faculty of Electrical Engineering and Information Technology (FEI STU). I completed my bachelor's degree in Applied Informatics and am currently pursuing a master's degree in Cybersecurity, although I enjoy programming more. Recently, in my free time, I have started developing applications and games. I enjoy thinking about simple projects that I can bring to completion and that are genuinely useful.

TECHNICAL SKILLS

Intermediate: React, Dart, Kotlin, CSS, HTML, SQL, Java, React Native

Beginner: PHP, Python, C, C++, C#, JavaScript

Tools: Adobe After Effects, Sony Vegas Pro, Photoshop, DaVinci Resolve

Services: Supabase, PostgreSQL, Firebase

WORK EXPERIENCE – IT

Python Developer

BlueLemon Solutions · 10/2022 – 03/2023

AI development in Python – predictive model for forecasting days with lower energy consumption for an energy company.

Intern – Document Development

Softec · 06/2022 – 08/2022

Creating templates for automated document generation. Working with XML, Word templates, and internal templating language.

QA Tester

iTaps · 06/2022 – 08/2022

Manual software testing for various clients. Using Jira tool for bug tracking.

Photo Editor

SportZoo · 10/2024 – present

Cropping and editing product photographs.

Freelance Graphic Designer / Video Editor

Jaspravím.sk · 2020 – present

Photo editing in Photoshop and video editing for various clients.

OTHER WORK EXPERIENCE

Warehouse Worker

Kruidvat (Netherlands) · 06/2024 – 08/2024

Warehouse work – order picking.

Warehouse Worker

Book Warehouse (Netherlands) · 06/2023 – 08/2023

Sorting and processing books.

Seasonal Worker

McIntire Fruit Ltd (Scotland) · 06/2021 – 08/2021

Seasonal agricultural work – fruit picking.

Seasonal Worker

McIntire Fruit Ltd (Scotland) · 06/2020 – 08/2020

Seasonal agricultural work – fruit picking.

Warehouse Worker

Macom – meat warehouse · 06/2018 – 08/2018

Packing and shipping goods.

EDUCATION

MSc. Cyber Security – in progress

Slovak University of Technology, FEI · 2024 – present

BSc. Applied Informatics

Slovak University of Technology, FEI · 2020 – 2024

High School Diploma – Technical Lyceum

SPŠE Košice · 2016 – 2020

PERSONAL PROJECTS

Foreign Language Vocabulary Learning App – coming soon to Google Play

Kotlin · Jetpack Compose · Material3 · Supabase · DataStore · minSdk 26

Independently developed Android application supporting 20 languages, featuring 40 levels of the most frequent words and 20 thematic levels (chemistry, anatomy, professions, etc.).

- Local persistence via DataStore, Supabase backend
- Text-to-Speech pronunciation in the selected language, swipe gesture to mark learned words
- Configurable number of answer choices, many color themes, multiple languages

Time Repeater - Google Play Store · 2024–2025

Kotlin · Android SDK · RecyclerView · Firebase Analytics · ProGuard

Android multi-timer application for managing multiple timers simultaneously, with an advanced alarm system that continues working even after the app is killed by the system.

- Persistent layer via SharedPreferences + Gson, no external database
- Localization into 6 languages (SK, EN, DE, ES, FR, RU) with dynamic locale change at runtime
- Notifications with full-screen intent, vibrations, and custom alarm sound logic (MediaPlayer with looping)
- RecyclerView with drag-to-reorder, custom HueBar View (HSV color picker), signed release build

Snowball Roll Down (Unity, C#) – mobile game on [Google Play Store](#). A ball rolls down a hill, collecting coins and power-ups while dodging obstacles. Features upgrade system, global leaderboards via Google Play Games Services, and AdMob monetization.

Soundboard Studio (Flutter, Dart, Kotlin) – mobile application on [Google Play Store](#), allows creation of custom soundboards, sound recording, and layout editing. Complete publishing process including app signing and content policies.

Farm Idle Game (Unity, C#) – *in development*. Mobile Android idle farm game with daily rewards. The player manages multiple farm scenes with different types of animals and fields, collecting resources by tapping.

Match-3 RPG (Unity, C#) – *in development*. Mobile Android game combining match-3 mechanics with a combat system. Each hero has unique abilities that activate upon matching three tiles and provide boosts during battles against enemies.

ACADEMIC PROJECTS

Portfolio: chupacabra2023.github.io/PersonalSite/#!/projects

GitHub: github.com/MarcelSotak111443/school-work

High School

Lunch Rating System (Arduino, C, PHP, SQL, JavaScript, HTML, CSS) – hardware application for rating lunches using buttons and a chip, sending data to database, and a website with rating statistics.

BSc. Year 1

Ludo Game (Python) – game with game logic

Monster Battle (C) – working with pointers

BSc. Year 2

Rocket Flight Simulation (C++) – setting initial values, tracking movement in terminal

Duck Hunt (Java) – terminal game similar to duck hunt

Reversi (Java) – graphical Reversi game

REST API (Spring Boot) – backend API

BSc. Year 3

Web Technologies Basics (HTML, CSS, JavaScript) – practicing basics, working with elements and interaction

Lunch Menus (Bash, curl, HTML) – automatic data retrieval from various restaurants and combining them into one website with filtering options

Athletes Management (PHP, SQL) – web application with database, merging and selecting athletes into tables with filtering options

Map Application (PHP, JavaScript, Leaflet) – application utilizing external REST APIs (geolocation, weather, countries), displaying data on an interactive map and storing visits in MySQL database with subsequent statistical analysis

WebSocket Ping Pong (JavaScript, WebSocket) – web game, bouncing ball for up to 4 players in real-time using websockets

RPG Game (JavaScript, Phaser) – game with game logic, quest system, difficulty levels, and UI menu. PWA functionality support (Service Worker, manifest) for offline mode

Bachelor's Thesis (React, Node.js) – controlling Arduino board with dynamic system using web application and node.js

MSc. Year 1

Neural Networks (Python) – image recognition, classification, and value prediction

Network Scanner (Python, Nmap) – network scanning and storing in NetBox

MSc. Year 2

Recipe Swiper (React Native, Supabase) – swiping recipes, login/register, rating, saving, reporting, database utilization

Geofence App (Kotlin) – nearby users, profiles, LiveData, RecyclerView, login/register, workers, geofence, viewmodel, SharedPreferences, DataBinding, fragments

Joinly — Master's Thesis (Kotlin · Jetpack Compose · Firebase · Google Maps · MVVM) – Full-featured Android application for discovering and managing events with 15+ functional modules. Single-Activity architecture, Firebase Firestore real-time database, authentication (email + Google Sign-In), real-time chat, QR check-in (CameraX + ML Kit), 6-factor recommendation algorithm, participation penalty system, integration of Google Maps API, Cloudinary, ZXing. Covered by unit tests.

CERTIFICATES

Autodesk – Certificate of Project Completion

Project in Autodesk application

Ja Slovensko – More Than Money

Entrepreneurial, economic, and financial education

Direct Language Lab – Certificate of Studies

English language course

Selenium Java Test Framework & Best Practices – Masterclass

Online course

The Complete 2025 Software Testing Bootcamp

LANGUAGES

Slovak – native language

English – B2

German – A1

INTERESTS

Volleyball, weightlifting, calisthenics

Educational literature (nature, health, universe)

Playing guitar, game development

Creating mobile applications
